Art Unit: 2829

1. Claims 1,3-10,12-19 are allowed. The following is an examiner's statement of reasons for allowance:

Claims 1 and 10 are allowed since the prior art does not disclose the steps of "configuring said I/O pin by connecting said I/O pin to a first node of a pull-up resistor and connecting a second node of said pull-up resistor to a power source, configuring I/O pin as an open collector output that will serve as both an input pin and an output pin and in combined with other claimed method steps. Since claims 3-9 and 12-15 depend from claims 1 and 10, these claims are also allowed accordingly.

Claim 19 is allowed since the prior art does not disclose a product having instructions for generating a bit stream by repeatedly opening and closing a switch that is external to said device and connected to said I/O pin to generate said first and second pulses,instructions for generating said first pulses by closing said switch for a first length of time; and instructions for generating said second pulses by closing said switch for a second length of time and in combined with other claimed instructions.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
